## DETAILED ACTION

### *Election/Restrictions*

1. Claims 2, 10-12, 42-44 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made in Paper No. 9.

### *Inventorship*

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

### *Specification*

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the **range of 50 to 150 words**. It is important that the **abstract not exceed 150 words in length** since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The

Art Unit: 3747

abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 3-9, 13-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Buehrle II et al (6,024,060). in view of Manka et al (5,834,407).

Buehrle II et al teach a camless internal combustion engine. Manka et al teach a low-phosphorus or phosphorus-free lubricating oil composition containing an extreme-pressure additive comprised of metal and phosphorus, provided the amount of phosphorus contributed to the low-phosphorus or phosphorus-free lubricating oil composition by the extreme-pressure additive does not exceed about 0.08% by weight based on the weight of the low-phosphorus or phosphorus-free lubricating oil composition (See col. 10, 15 and 28). Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ the low-phosphorus lubricating oil composition in the engine of Buehrle II et al as taught by Manka et al in order to reduce wear, noise and exhaust emissions.
